

THE BASIC-D and BASIC-S

The most competitively priced Braille embossers in their class

Now With USB and Network Support

- With the Basic embossers, the cost of producing Braille is decreased to a level slightly above a quality laser printer. The user's options combined with the speed and record of reliability make the Basic S and Basic D the most competitively priced embossers available.
- You control the Basic embossers with a front panel labeled both in ink and in Braille, that gives you voice confirmation of the keys pressed, thus making them the most user-friendly line of Braille embossers available.
 - The Basic embossers are able to produce graphics as well as regular Braille text with excellent durability and high speed.
 - The USB, Ethernet, parallel, and serial interfaces insure easy connection to your computer or network.
