

# SWELL-FORM GRAPHICS MACHINE

The SWELL-FORM GRAPHICS machine is a simple, fast and low cost method of creating stunning tactile diagrams or graphics.

The SWELL-FORM GRAPHICS machine produces superbly defined touch-sensitive relief diagrams sheet after sheet.

- Small, robust and reliable
- Simple and quick to use
- Low cost

The SWELL-FORM GRAPHICS machine is used in conjunction with SWELL-TOUCH Paper to produce tactile diagrams. Just print directly on to the SWELL-TOUCH Paper and then push it through the SWELL-FORM GRAPHICS machine. It's as simple as that!

This machine has revolutionized the process of creating tactile images. It is now so easy (anyone can use it) and inexpensive that the cost is no longer an obstacle to ownership. Indeed, the whole process through the SWELL-FORM GRAPHICS machine takes less than 7 seconds!!!

What types of tactile diagrams can be produced?

- Braille and/or Moon text/labels
- Maps, building layouts, route maps
- Graphs, charts
- Symbols, pictures
- Plus lots more!

What features are included on the SWELL-FORM GRAPHICS machine?

- Auto start and stop
- Consistent and superb quality time after time
- Fully adjustable temperature control
- Capability to process several sizes
- Safe, user-friendly, non-hazardous products and process
